Education

2022
MERN Full-stack Web Developer
(Ironhack Madrid)

2019/2020
Higher Technician in Guide Information and Tourist Assistance
(IES Tetuán de las Victorias)

2017 - Now a days
Geography and History Degree
(UNED)

Projects

- **DEVINVADERS**: Second version of the first project I did at Ironhack, refactored and following Clean Code practices.
- **GEOFILM**: Application that allows you to geolocate film shoots, based on the Google Maps and IMDB APIs, and the NodeJS, HBS, Express and MongoDB technologies. My main role in this project was the design of the front.
- **TIMESHARE**: Digital time bank platform that allows the exchange of services between users without economic mediation. As a full-stack application, the project has a server and a client. The project was finished against the clock, in more than 150 hours during only 2 weeks, during which my functions were focused on the design and architecture part.

About me

After 12 years of experience as a freelance mountain and tour guide, I felt I need to turn my career around and move to a sector with more future projection, so I attended a Full-stack Web Development bootcamp at Ironhack Madrid.

I am currently looking for new opportunities to continue developing my technical skills in the IT sector.

Hard Skills

- **MERN**: As full-stack developer, I know about HTML, CSS, JavaScript, MongoDB, NodeJS, Express, ReactJS, Flexbox/Bootstrap, Mongoose, Axios, Git, GitHub, Markdown, WordPress, and general knowledge about Google Analytics, SEO, API integrations, Canva, Trello, Asana, Notion, Obsidian...
- **SALESFORCE**: I'm also Official Salesforce Admin, and I have a general knowledge about the platform. I also worked with other CRMs.

Soft Skills

- **Professionality**: I have lived almost always as a freelancer, and I know that without attention to detail and dedication, things do not work well.
- **Maturity**: I'm not 20, and that's good! I'm the perfect candidate if you're looking for someone with experience who takes things seriously.
- **Communication**: Thanks to my background, I have great synthesis and communication skills.
- **Commitment**: At this point in my life, I value stability above all else. If my company takes care of me, I take care of my company.

Experience

2022-Nowadays
<u>Front-end web developer at "theoms.es"</u>
I am currently working in a small marketing agency based in Madrid, developing projects mainly in Wordpress, HTML, CSS and Javascript.

2021-2022
<u>Freelance web developer</u>
Little WordPress environment based projects and first contacts with HTML and CSS.
In this stage, I juggled my job as tour guide with the development of small web apps in order to earn some experience in the tech sector.

2016-2022
<u>Freelance Tour Guide</u>
Managing of my own tour business in Madrid.
I built by myself my own web platform with a booking system, saving more than the 50% of the end costumer's time than other similar companies in the sector.
Design more than 10 tours per year and execute an average of 2 at day.
Day to day deal with the end customers and suppliers.
I also designed and execute the business approach, and all the 360 marketing strategy.
